Award-winning content for your learning platform

Have you already successfully introduced a learning platform in your organization?

Whether it is an LMS (Learning Management System), Learning Pathways, SharePoint or simply the intranet site that is most popular with employees, our soluzione learning content can be easily integrated into your existing learning platform via SCORM, DeepLinks or LTI.

Your advantages:

- Easily extend existing content
- Consistent corporate design
- You decide which of our learning content to display
- You can use your LMS exclusively or in addition to our platforms
- Export is included with the purchase of solution course modules at no additional cost.
- We can also create additional custom content for you upon request.

Or is Microsoft Teams the center of communication and collaboration for you?

Then we have the perfect channel and entry point to all learning content in soluzione42 Web with soluzione Teams integration. Learning on mobile devices is then also possible via the Teams app.

- Easy deployment and rollout.
- The app is presented as a practical icon in the Teams sidebar and enables access to the entire knowledge platform offering with just one click.
- You can also access soluzione learning content on the move without having to leave the Teams application.
- No separate web address is required.
- Seamless integration means you don't have to switch between different windows or browsers.
- It is possible to adapt the main navigation to your needs and thus personalize the user experience.
- Additionally, you can adapt the main icon, the app name and the primary color to your corporate design.

Our content on M365

- Around 3,500 learning units on Microsoft topics immediately available in 6 languages
- Completed courses for a wide range of M365 apps-Extensive videos for learning and click paths for performance support in seconds
- Productivity use cases-Governance topics-Consistently high methodological and didactic quality
