

soluzione AI Driver's License®

Basic AI training with soluzione - compliant, protective, and investment-secure

A chance rather than a burden

With our AI Driver's License®, companies fulfill the European AI Act's **training requirements** and protect their **sensitive data** through targeted awareness training for their workforce. At the same time, they cleverly secure all **AI investments and licenses**.

soluzione AI Driver's License® the original – a smart choice

This well-designed product offers several advantages:

All content has been reviewed and certified by **reuschlaw**, a law firm specializing in compliance.

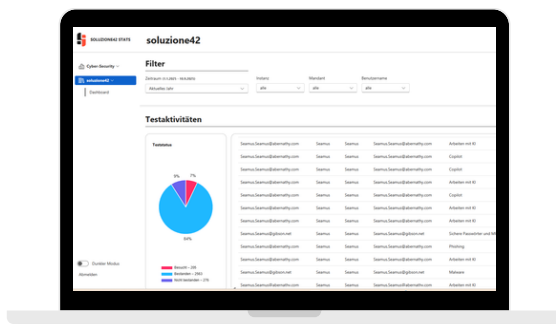

In addition to questions, the **configurable test area** also provides direct feedback and recommendations, thereby ensuring that knowledge is retained in the long term.

The **high-quality, animated educational films** are produced with a dash of humor, making them enjoyable to watch.

Personalized certificates ensure that everyone has completed the course—easily trackable in the dashboard.

Updates will be provided throughout the entire subscription period to ensure that you are always up to date in the fast-paced world of AI.

The **AI Driver's License®** can be integrated wherever customers need it: into the LMS, Teams, SharePoint, or provided learning portals.

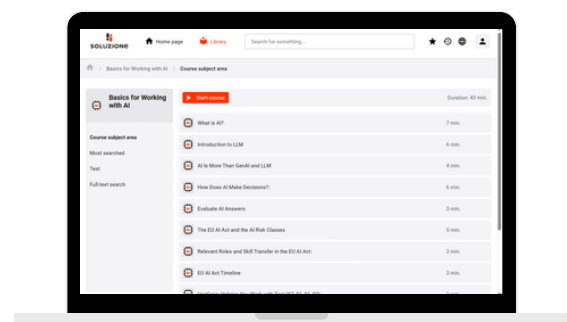

Statistical Analysis

The **soluzione Metrics dashboard** provides information about learning progress and the status of AI Driver's Licenses® already issued to employees in the system.

Product Integration

The e-learning courses and tests are flexible in their use and can be integrated into an existing LMS or used via the in-house **soluzione learning portals (web & app)**.

soluzione - an established e-learning provider

With 25 years of experience in creating online content, soluzione is now a leading e-learning provider in the areas of **Modern Workplace, Cybersecurity Awareness, and AI**. At soluzione, we successfully support companies in user adoption for the digital workplace and work with our customers to establish new productive and healthy working habits for all employees.

The **forward-looking educational concept** is based on a research collaboration (LMU Munich/FZI at the University of Karlsruhe) on the topic of “computer-assisted learning.” soluzione has already won several awards for this, such as the European E-Learning Award, E-Learning Provider of the Year, and the Enterprise Workspace Award.
