

Rethinking Compliance: Impart Knowledge • Minimize Risks • Secure Evidence

Companies today face a growing number of **regulatory requirements** – from data protection and occupational safety to AI compliance. At the same time, however, **scalable solutions** for sustainably training employees and fulfilling legal documentation obligations are often lacking.

With soluzione's **compliance portfolio**, companies receive a modular, practical learning solution to clearly convey relevant topics and thus promote direct behavioral changes in everyday work. Individual control and measurability of results are always ensured through our intuitive cockpit. The learning content can be made available on our **soluzione platforms** or can be easily integrated into any common **LMS**.

Your added value at a glance

- ✓ **Increase legal certainty**
Fulfillment of legal training obligations & verifiability (tracking in the soluzione Cockpit including reminder function)
- ✓ **Minimize risks**
Early awareness training reduces compliance violations
- ✓ **Employees activate**
High acceptance due to practical content and modern learning methods
- ✓ **Ensuring sustainability**
Continuous learning opportunities instead of one-off mandatory training courses

With soluzione, compliance transforms from a mere obligation into a genuine success factor:

Thanks to evergreen content with continuous updates, employees are empowered to always act correctly, and companies remain legally compliant, efficient, and future-proof.
